

Adolescent Preventive Care - ADL

Intent: At least outpatient visit during the measurement year.

Age: 12-17 years of age

Product Lines: Commercial, Medicaid

Timeframe: January 1 - December 31 of the measurement year

Reporting Requirement: NYS QARR

At a minimum for compliance, ADL documentation requires the following components:

- Assessment or counseling or education on risk behaviors with sexual activity and preventive actions
- Assessment or counseling or education for depression
- Assessment or counseling or education about the risk of tobacco usage
- Assessment or counseling or education about the risk of substance use (including alcohol and excluding tobacco)

Practitioner Type:

Primary Care Provider (PCP) or OB/GYN

How to submit compliant data:

Encounters/claims, supplemental data and medical records

Tips and Recommendations

- Document all components of service rendered with notation indicating specific compliance component that was addressed.
- Use checklist indicating topics were discussed.
- Use standardized templates that allow for check boxes for standard counseling activities.
