

Breast Cancer Screening HEDIS/QARR Measure Changes

1. Compliance is measured from claims **ONLY**. Chart reviews are no longer allowed. Mammograms for which claims have not been submitted cannot be counted as compliant unless we are in possession of the mammogram report itself.
2. The age range for compliance has been lowered to 42 years, with a two year look back. The age range is now 42 to 69 years. Please make a special effort to begin referring your patients for screening mammograms as of 40 years of age.
3. Diagnostic mammograms are included in this measure as of 2008.
4. A woman is compliant if she has a mammogram every 1 – 2 years. To be compliant in 2010, a mammogram would have to be done in 2009 or 2010.
5. Make sure one of the codes below is listed to assure capturing this procedure.

Codes to Identify Breast Cancer Screening:

CPT Codes	ICD-9-CM Procedure	ICD-9-CM Diagnosis	HCPCS
77055-77057	87.36, 87.37	V76.11, V76.12	G0202, G0204, G0206
